

WARREN HOUSE VETERINARY CENTRE

Post-Sedation Homecare

Your pet has recently undergone sedation.

Complications:

Please notify the practice at once if any of the following occur:

- Vomiting after 24 hours at home
- Diarrhoea
- Refusal to eat or drink after 24 hours at home
- No passing of urine or faeces 24 hours after their procedure
- Signs of severe pain (mild pain and discomfort are normal for the first few days after surgery)
- If your pet acts off or seems "not right" in any other way

By following the guidelines below, you will be able to dramatically speed up your pet's Recovery.

- Offer your pet small amounts of water when you get home and food can be offered a few hours later – we recommend a bland diet such as chicken/white fish and Rice/pasta or the food included in your home care package. However, their appetite may not be completely normal for a few days.
- Do not give any over-the-counter pain relievers such as paracetamol or ibuprofen as these can be poisonous to pets. We will prescribe non-steroidal pain relief medication for the following 3-5 days after surgery which should keep your pet comfortable during their recovery.

Post-Operative Telephone Call - A staff member will call you a few days after the procedure to check on your pet. Do not be alarmed. This is a routine call to find out how your pet is progressing after their sedation.

WARREN HOUSE VETERINARY CENTRE
